ENHANCED DETECTION AND IMAGING

- Upgraded WDR (up to 140 dB) to significantly reduce image glare
- Increased IR distance by 2X (up to 60 m (197 ft))
- P-Iris and improved minimum illumination (0.007 Lux@30 IRE) provides better image quality in variable or low light conditions
- Improved shutter speed (1/1000000 ~ 1/5) allows faster capture of moving subjects, reducing motion blur and producing sharper images
- Enhanced 3D noise reduction eliminates visual noise resulting in crisper details for identifying objects or people in video footage
- Smart IR Technology automatically adjusts to changing light conditions and object distances for better capture of details even in dimly lit or nighttime scenes

INTELLIGENT SURVEILLANCE

- New and improved probabilistic AI video object analytics to quickly detect suspicious activities and identify attributes such as faces, vehicles, gender, age, colors of cars or personal attire for faster investigative search
- Visible bounding boxes with MAXPRO integration
- Supported in the Milestone plugin intelligent search

INCREASED OPERATIONAL EFFICIENCY

- System security enhancements with Secure Boot and latest FIPS 140-3 chipset provide secure data integrity and privacy
